Inventoried Object Codes and their Corresponding Class Codes
Revised 07/2016

Remember: Inventoried items consist of CONTROLLED purchases and CAPITALIZED purchases.

Class Code is a very important six digit number. It is usually the first four digits of the voucher's object code plus two more digits that further define it. A complete list of all class codes can be found in FAMIS on FFX screen 581. The complete list can also be found on FRS screen 362 when creating a preliminary fixed asset by placing a question mark (?) in the Class field and pressing Enter.
