PROCEDURE STATEMENT

The safe operation and proper maintenance of farm equipment provides endurance for the equipment and enhanced safety for the operators.

REASON FOR PROCEDURE

This procedure establishes the guidelines for the safe operation of farm equipment to enhance the safety of Texas A&M AgriLife Research (AgriLife Research) employees.

PROCEDURES AND RESPONSIBILITIES

- A. Train personnel to operate the equipment safely following AgriLife Research Procedure 24.01.01.A0.04, *Occupational Health and Safety*.
- B. Perform routine maintenance (to include lubrication, oil and oil filter replacement, air filter replacement, battery check) on equipment.
- C. Retain maintenance records for all equipment serviced in the Laserfiche Document Management System in section 5.6.1 by the equipment item in accordance with the System Records Retention Schedule Section 5.6.
- D. House equipment, where possible, to protect it from the effects of weather.
- E. Number and identify all equipment in accordance with the procedures in AgriLife Research Procedure 21.99.99.A0.01, *Inventory Procedures*.
