---

#### **PROCEDURE STATEMENT**

---

There are occasions when a person who is not an employee of The Texas A&M University System (A&M System) is present in a Texas A&M AgriLife Extension Service (AgriLife Extension) facility. Non-employees may be exposed to potential hazards in laboratories, pesticide treated fields, shop areas, etc. Any person who is not an A&M System employee and who will be involved with potentially hazardous procedures at an AgriLife Extension unit must be supervised and properly trained.

---

#### **REASON FOR PROCEDURE**

---

This procedure provides guidance to units to ensure the safety of non-employees.

---

#### **PROCEDURES AND RESPONSIBILITIES**

---

##### 1.0 SUPERVISION

- 1.1 Each non-employee, including visitors, at an AgriLife Extension unit must be supervised by a member of the AgriLife Extension staff.
- 1.2 Children under 15 are generally not allowed in any area—including laboratories—in which hazardous chemicals, biological materials, radioactive materials, radiation-generating devices, or dangerous equipment are located or used. Exceptions may be granted for guided tours or other reasons if appropriate precautionary measures are taken. These measures may include written consent of parent or guardian, and require direct adult supervision. Unit heads may require additional safety measures prior to allowing access.

##### 2.0 TRAINING

- 2.1 Each non-employee must be trained regarding proper procedures and precautions before unsupervised work is allowed.
- 2.2 The training must include information in sufficient detail to ensure that the non-employee will be able to conduct procedures safely, and will be knowledgeable regarding emergency response procedures.
- 2.3 Examples of training topics to address, as appropriate, include (but are not limited to): location of fire alarms, fire extinguishers, first aid kit, and other emergency response equipment; procedure to report an emergency; waste collection and disposal procedures (chemical, biological, and radioactive materials); location of Material Safety Data Sheets; evacuation plan and location of emergency exits; safe operation of equipment; availability and proper use of protective clothing.
- 2.4 Document training for non-employees in the same manner that training for employees is documented by using the Employee Training and Development Record.

### 3.0 OPERATION OF VEHICLES AND FARM MACHINERY

Under the A&M System-wide self-insured plan, non-employees are not authorized to operate AgriLife Extension vehicles. See AgriLife Extension Procedure 24.01.01.X0.03 for additional information. At his or her discretion, a unit head may allow a non-employee to operate a tractor or other farm machinery if the non-employee has been trained in the safe operation of the equipment, training has been documented, and liability insurance of the non-employee has been confirmed. In the event the non-employee is not covered by liability insurance through alternative sources, the unit head may weigh the risks associated with the non-employee use of the equipment and approve/disapprove its use.

### 4.0 MINORS

Activities prohibited by the Fair Labor Standards Act for employees under the age of 18 years shall also apply to non-employees under the age of 18 (A&M System Regulation 31.01.02, *Fair Labor Standards Act*).
