TO Texas A&M AgriLife Unit Heads & Business Administrators

SUBJECT: iPayments Online Revenue Portal

Please forward to appropriate faculty & staff.

Texas A&M AgriLife is pleased to announce that we are joining a shared services initiative in conjunction with several Texas A&M System members, including Texas A&M University, on the upcoming implementation of CORE's iPayment Revenue Portal. iPayments is an online transaction management system that provides units with an online system solution for accounts receivable, interdepartmental transfers (IDTs), and cash deposit transactions. With automatic posting to FAMIS, iPayments allows for efficient processes in both units and the fiscal office.

The iPayment Committee comprised of representatives from both FAMIS and local TAMUS members met with Core Business Technologies mid-September discuss the design. The official statement of work is expected from Core Business Technologies in early October.

We will be scheduling time with units over the next few months to continue discussions and provide additional information.

Should you have any questions, please contact Donna Alexander at d-alexand@tamu.edu or via phone 979-845-7879.
