GUIDELINE SUMMARY

Texas A&M University (TAMU) College of Agriculture and Life Sciences (College) recognizes the importance of maintaining an open research and educational environment that welcomes participation of individuals from around the world as part of the Texas A&M AgriLife (AgriLife) mission. Approval procedures must be adhered to in efforts to safeguard against potential violations of federal laws and regulations, Texas A&M University System (A&M System) policies and regulations, and AgriLife rules, procedures, and obligations.

These procedures establish compliance guidelines for the approval of visiting scholars, scientists, and interns.

PROCEDURES AND RESPONSIBILITIES

1.0 GENERAL

1.1 For purposes of these procedures, both domestic and international visitor types have been delineated into two categories: exempt and non-exempt.

A. Exempt Visitors—visitors are exempt from the visitor exchange program (visiting scientists, scholars, or interns) if none of the conditions in 1.1.B exist, and if one or more of the following conditions exist with respect to the anticipated visit:

1. the visitor will meet with colleagues to discuss a possible research project or collaboration;
2. the visitor will tour labs or research facilities that are not otherwise restricted under United States (U.S.) export control laws; or
3. the visitor will participate in general academic or scientific meetings, presentations, or interviews.

B. Non-Exempt Visitors—non-exempt visitors are those who are part of the visitor exchange program (visiting scientists, scholars, or interns), thus one or more of the following apply:

1. the visitor will be involved in a research project or collaboration, or will have access to laboratories to observe or conduct research;
2. the visitor will be issued a TAMU/AgriLife identification card, keys to offices or laboratories, or otherwise given access to TAMU/AgriLife computing systems in any way or manner; or
3. the visitor will be paid an honorarium, will be reimbursed for expenses, or will be provided something of monetary value.

1.2 Visiting scholars, scientists, or interns are not College employees.
1.3 A host is the employee who extends the offer, secures approval for visits, and takes responsibility for overseeing and monitoring the visiting scholar, scientist, or intern when that individual is accessing College (and any other AgriLife entity such as Texas A&M AgriLife Extension Service [AgriLife Extension], Texas A&M AgriLife Research [AgriLife Research], and Texas A&M Veterinary Medical Diagnostic Laboratory [TVMDL]) facilities and resources.

2.0 DOMESTIC VISITORS

2.1 Exempt Domestic Visitors—Domestic visitors who are exempt in accordance with definitions contained herein require no advanced approval by AgriLife Risk and Compliance. Note: No completion of AgriLife forms AG-713, Export Controls Compliance Review | Visitor Exchange Programs and Employment, is needed.

2.2 Non–Exempt Domestic Visitors—Domestic visitors who are non–exempt in accordance with definitions contained herein require completion of AgriLife forms AG-713 and AG-718. Review and approval procedures of non–exempt visitors are contained in section 4.0 of this procedure.

3.0 INTERNATIONAL VISITORS

3.1 Exempt International Visitors—International visitors who are exempt in accordance with definitions contained herein require no completion of AgriLife forms AG-713 and AG-718. However, College employees intending to invite or host exempt international visitors shall contact AgriLife Risk and Compliance in advance of the intended visit. AgriLife Risk and Compliance will conduct restricted party screenings (RPS), and consult with the host to ensure that the visitor will not be given access to any restricted items or information.

3.2 Non–Exempt International Visitors—International visitors who are non–exempt in accordance with definitions contained herein require completion of AgriLife form AG-713. Review and approval procedures of non–exempt visitors are contained in section 4.0 of this procedure.

4.0 REVIEW AND APPROVAL PROCEDURES OF NON–EXEMPT VISITORS (VISITING SCHOLARS, SCIENTISTS, OR INTERNS)

4.1 Review of Initial Requests

A. Upon receipt of an initial inquiry from an individual or entity, the College host—either the recipient or initiator of the request—should discuss such intended visit with the department/unit head to consider implications for the department/unit prior to acknowledging receipt of the request. If unusual or unique circumstances exist, College hosts and department/unit heads should discuss the request with the Director and/or the Vice Chancellor and Dean.

B. Any response or requests for additional information should clearly state that the request is being considered.

4.2 Approval Procedures

A. A completed AG-713 (and associated documents) must be submitted and approved before the College host extends an offer to the visiting scholar, scientist, or intern.

B. After department/unit head signature has been obtained, AG-713 forms (and associated documents) shall be routed to AgriLife Risk and Compliance for additional approval routing.

C. Once the visit is approved, AG-713 will be forward to TAMU Immigration Services for Faculty and Scholars (ISFS). The department/unit will then consult with TAMU ISFS for visa and/or visitor exchange programs.

D. After the AG-713 is approved, all visiting scholars, scientists, or interns may execute an AG-718 if appropriate.

E. Further instructions can be obtained in the AgriLife Export Controls Compliance Program Manual.
F. Extending Invitations

After a completed AG-713 (and any associated documents) have been approved, the host employee may extend an invitation. Documentation outlining terms, conditions, and financial arrangements will be prepared via a completed AG-718. The AG-718 must be fully executed, and a copy forwarded to AgriLife Risk and Compliance before the visiting scholar, scientist, or intern is allowed to begin the exchange program. TAMU ISFS will assist with other requirements of the visitor exchange program.

G. Changes in Terms of the Visit

Any changes in the initial terms and intent of the visit require the host employee to immediately notify AgriLife Risk and Compliance.

5.0 EXPORT CONTROLS COMPLIANCE

5.1 In accordance with College Guideline, Export Controls, the College is committed to complying with U.S. export control laws and regulations as promulgated by the U.S. Department of State through its International Traffic in Arms Regulations (ITAR) and the U.S. Department of Commerce through its Export Administration Regulations (EAR), as well as those imposed by the U.S. Treasury Department through its Office of Foreign Assets Control (OFAC).

5.2 No international visitor may have access to export-controlled items or information unless expressly permitted via an approved technology control plan, license, or as authorized in writing by AgriLife Risk and Compliance.

5.3 In accordance with College Guideline, Export Controls, it is the individual responsibility of College employees to promptly disclose any violation of export controls laws, regulations, policies, rules, or procedures either via the Ethics Point Hotline or the export controls empowered official.

5.4 If a proposed activity is denied by the College Associate Dean, and the host employee would like to appeal the decision, they may do so in accordance with procedures contained within Export Controls College Guideline.

6.0 RESEARCH COMPLIANCE PROTOCOLS

College employees hosting visiting scholars, scientists, or interns shall adhere to any research compliance obligations and procedures to include but not limited to those applicable to non-disclosure agreements, export controls, animal welfare, biosafety, and human subjects research protocols.
